

## Sustainability

Sussman Shank is committed to sustainability, and we recognize our responsibility for environmental conservation in our workplace. We have implemented practices that incorporate environmental, economic, and social sustainability considerations into firm operations. This includes reducing paper usage, energy conservation, recycling, composting, and alternative transportation options. In the end, our workplace uses less energy, creates less waste, and creates a culture where employees know that they are making a difference every day.

For thirteen consecutive years, Sussman Shank has been recognized as one of Oregon's 100 Best Green Workplaces, which is a testament to our firm's unwavering dedication to sustainability.

As a part of our ongoing commitment to sustainable practices, our firm recently integrated tree free paper from TreeZero into our offices.

TreeZero is a sustainable solutions company that supplies 100% tree free, carbon neutral paper made from sugarcane waste fiber.

Overall, our commitment to sustainability is an important part of our firm's values and culture. We believe that sustainability is not only good for the environment but also for our clients, employees, and communities, and we are dedicated to promoting sustainable practices both within our firm and throughout the legal industry.
